While serving you in this hotel where you can have a good time with your family and collect good memories, we do not ignore the protection of nature. Our sole goal is to implement the environmental policy we have adopted in order to protect the environment, to respect other living things as well as ourselves and to defend their right to life, within the framework of current laws and practices, and most importantly, with the support of you, our guests.

The issues we have mentioned below for the protection and development of the right to life of other living beings other than us will be constantly updated according to today's requirements and needs, but we will never deviate from the target.

For this;

- We carry out our activities with the awareness of our responsibilities towards the environment and society, believing in continuous development and believing in a sustainable environment, and we will ensure its continuity.
- By keeping the factors that may cause environmental pollution under control, we will minimize the pollution and damage we will cause to the environment.
- We will fulfill our legal obligations and comply with environmental legislation and administrative regulations.
- In order to prevent environmental pollution, we will work to reduce, reuse or recycle polluting waste at its source.
- We will implement activities to use energy and natural resources at the optimum level and to prevent unnecessary resource use.
- In order to make our natural resources sustainable, we will regularly monitor our water and electricity consumption and take protective measures to prevent excessive consumption.
- In order to prevent excessive chemical consumption, we will continue to provide training to our personnel on the necessity of using chemicals adequately.
- We know that using hazardous substances and chemicals only when needed and as much as necessary will reduce both the negative effects on the environment and the amount of waste,
- We contribute to the protection of nature by choosing the materials we buy in our business with "recycling" and "environmentally friendly" labels. We try to create reuse opportunities,
- We take care to use disposable materials such as paper, napkins, toilet paper, packaging as much as necessary and leave less waste to nature,
- We store the wastes correctly in separate areas according to their characteristics, deliver them to licensed/authorized companies without exceeding the legal storage time limits, and keep their records,
- We try to use water, energy and all natural resources economically. We share this sensitivity with our employees, guests and suppliers.
- We measure our performance in environmental management, monitor this data with targets and try to improve our performance.
- We aim to educate our employees about the environment and increase their awareness.
